CAREER OBJECTIVE

Bachelor of Technology in Computer Science and Engineering with skills in Python, SQL, machine learning, and data visualization. Seeking a Data Scientist role to apply analytical and statistical skills to work with datasets and provide actionable insights that support business decisions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering	August 2022 – June 2026
MVGR College of Engineering, Vizianagaram	CGPA: 8.26
Board of Intermediate Education	June 2020 – March 2022
Narayana Junior College	Percentage: 84.8%

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Machine Learning & AI Frameworks:** Scikit-learn, TensorFlow, PyTorch
- **Data Analysis & Manipulation:** Pandas, NumPy, Exploratory Data Analysis (EDA), Statistics & Probability
- **Data Visualization Tools:** Power BI, Excel, Matplotlib, Seaborn
- **Databases:** SQL, MongoDB
- **Development Environments & IDEs:** Jupyter Notebook, Google Colab, VS Code
- **Version Control:** Git

PROJECTS

Voice Emotion Classification & Visualization – June 2025 – September 2025

- Implemented an LSTM-based classifier with diffusion augmentation to detect emotions from 10,000+ audio samples, achieving 82% overall classification accuracy.
- Extracted MFCC and Mel-Spectrogram features from raw audio to enhance model input quality, improving minority class recognition by 15%.
- Designed interactive dashboards to visualize emotion distribution and model confidence, aiding in data-driven insights for stakeholders.
- Optimized model performance by tuning hyperparameters and leveraging GPU acceleration, reducing training time by 40%.
- Evaluated model outputs and applied cross-validation techniques to ensure generalization, achieving consistent performance across all emotion classes.

Stock Market Trend Prediction– May 2025 – June 2025

- Engineered a Linear Regression model to forecast SBI stock prices, achieving an improvement of 12% in trend estimation accuracy.
- Analyzed 5,000+ historical stock records and constructed financial indicators to enhance model robustness and reliability.
- Streamlined regression and indexing methodologies, reducing prediction runtime by 30% while maintaining accuracy.
- Examined model performance using RMSE and residual analysis, ensuring consistent predictions across different market conditions.
- Applied automated visualizations of forecasts and regression fits, enabling faster interpretation and actionable insights for financial analysts.

CERTIFICATIONS

- Attained Oracle Data Platform Certified Foundations Associate – Oracle.
- Completed SQL for Data Science – edX.
- Certified in Data Science Using Python – Brainovision.
